INTRODUCTION

The Institute has achieved a great deal during this academic year.

We entered the year already acclimatized to the altered conditions of lockdown. All our standing seminar series ran throughout the year, with larger and more international audiences than ever participating over ZOOM. A few major events - such as the Ventris Memorial Lecture given by Jack Davis and Sharon Stocker on their phenomenal discoveries at Pylos - attracted audiences in the hundreds. A number are viewable as podcasts via the ICS website. We also hosted on-line conferences including a day meeting on pilgrimage in ancient Italy run by the Accordia Institute, our regular Byzantine conference (this year on Sacred Mobilities) and a dispersed conference Women Disrupting the Patriarchy convened by Greg Gilles. We had fewer visiting fellows than usual, but were very pleased to have Gil Gambash with us from Haifa on a Leverhulme Visiting Fellowship. He and I ran a seminar series on Deserts in Antiquity which roamed across North Africa and the Middle East from the Bronze Age to the early Islamic period: it attracted audience members from Mexico and the east coast to Egypt and Poland. Thanks to the energy, dedication and resourcefulness of Joanna Ashe and her staff the Library remained open throughout the year. Readers got used to booking places and to respecting social distancing while they worked. The library staff also supported readers remotely with postal loans and scans, and by building online resources for their use. The School and the University have provided excellent support as we re-entered the building and we are very grateful in particular to Elaine Walters and her team of professional service staff for making this possible. Like most organizations we have also got used to doing routine business virtually. Our committees continued to meet, to give grants and to make plans as usual throughout the year. We continued to work with our usual partners in the federal university, around the UK and overseas. It has not been business as usual, but we have remained busy.

The School of Advanced Study, led by a new Dean Professor Jo Fox, undertook a major restructuring over the course of this year. The main implication for the Institute has been that publications have been centralized within the School. We were very sorry to say goodbye to Dr Liz Potter in January. Liz transformed ICS publications over the last five years. Among her many achievements was the conversion of BICS into a journal publishing themed issues on cutting-edge topics across the classics. She also modernised and streamlined the production, marketing and distribution of our publications in partnership with colleagues in SAS publications. Liz negotiated a new and greatly improved deal with Oxford University Press to publish the journal, and lead us forward on Open Access. She created a
newsletter for the Institute and worked through a large backlog of supplements. It is good to report that all supplements accepted for publication are now in production with the University of London Press, and a smooth handover has been completed to our new colleagues there. We look forward to working with them in the future, and wish Liz all the best in her next projects.

Institute staff members have remained busy in conducting and promoting research and also in teaching. Dr Bodard was one of the organizers of Linked Pasts 6 in December in partnership with the British Library. He has also been running a number of courses, including a summer school on 3D Modelling and Digital Heritage planned for July which has attracted record numbers of applicants. Together with Joanna Ashe, he has planned a public engagement event, which among other things will highlight the Leventis funded digitization project completed this year by Aaron Fordwoh. Our contribution to MA teaching has continued, and the ICS has graduated its first doctoral student, Jordon Houston.

This is my last annual report as Director. It has been a privilege to work in the Institute over the last six and a half years. I am hugely grateful to the London classics community that made me so welcome, to the strong partnerships with the Hellenic and Roman Societies and the other UK classical bodies that have lent us their support in this time. The ICS enjoys phenomenal support from academics across the UK, convening seminars and conferences, helping us to teach and publish and to develop new initiatives as we have in digital classics. It has also a strong international network, including the BIRI institutes and all those overseas scholars who visit regularly and play such a large part in our work. It has been exciting being close to the centre of all this activity.

UK Classics is in excellent shape. It enjoys strong leadership provided by the CUCD and the Classical Association. Much new energy is being contributed by the Women’s Classical Committee and other groups committed to making Classics a more diverse and inclusive community. Around the country new classical courses and degrees have appeared in Southampton and Lincoln, in Manchester Metropolitan University and York St Johns, in Coventry and in Winchester. Intellectually it is more adventurous than ever, with Reception Studies going from strength to strength, with an ever-expanding exploitation of digital tools, with powerful new interdisciplinary connections being forged with cognitive science, ecology and global versions of antiquity.

It has been an extraordinary experience watching all this happening from close up. I have enjoyed exceptional support from past and continuing members of staff at the Institute. As well as the achievements of Liz Potter I would like to signal the contribution of Emma Bridges, now at the OU, for
getting our Public Engagement operation up and running. One person in particular has been a constant support and exceptional colleague from before I arrived to preparing the handover to my successor. The Institute and I personally owe a huge debt to Valerie James.

My thanks to everyone.
